

ENIG=Network for  
Energy Efficiency

# When and why?

- Projekt started late 2009
- Financed by STEM and participating SMEs
- Organised by Swerea SWECAST and FSEK
- Historically the focus was at larger energy-intensive companies
- ENIG -> new target -> energy-intensive SMEs
  - 5 type of industries (foundry, timber and furniture, plastic, heat treatment, surface treatment)
  - Aproximately 200 participating companies

# Overall aim

- Reduce rising energy costs
- Become more competitive
- Become more environmentally aware
- New method -> networking and cluster-building

# How?

## Method

- Primary; cooperation and networking
  - In the business (branch), between companies, between SME-municipality-regional energy agencies (EKR) etc.

# How? – more...

- Instruments (homepage, tool for energy ratios)
- Provide technology, routine, support function etc.
- Information and education/training
- Benchmarking
- Energy Management System light

# Result?

- **Overall goal**

- 30 % reduction in energy use by 2015

## **Effects during project**

- Energy awareness in SMEs → energy audits, energy plans etc.
- Positive feedback from SMEs. Satisfied with the arrangements
