

# CA EED – Good Practice Factsheet Template

Core Theme and topic	CT1: NEEAPs and annual reports and measuring progress in Energy Efficiency Topic: Overview of the 1 <sup>st</sup> annual report and processing the 1 <sup>st</sup> EED NEEAPs for 2014
Name of work programme/project	Approach for the chapter on the market for energy services in the next NEEAP
<b>Project scope and description</b>	
Short description of the programme & what it hopes to achieve	In the 2 <sup>nd</sup> NEEAP, Germany has set up a chapter on the market for energy efficiency. For the new NEEAP 2014, Germany plans to continue the description of the market of energy services. It is also planned to deepen the insights on the market and to improve the empirical basis.
What is the scope of the project?	In order to improve the information about the market for energy services, Germany conducted a study on the market for energy services
Who are the key people involved?	Federal Office of Economics and Export Control (BAFA) asked a consortium of institutes to conduct the study
Who was the target audience?	Public sector on federal level, interested public, EU
How was this work programme/ project financed?	Finances by the Federal Office of Economics and Export Control (BAFA)
What was the cost of the work programme/project ?	-
When did it start and end?	End: June 2013, Begin in 2012
<b>Project Outcomes &amp; Communication</b>	
What were the key achievements?	Information on the market for energy services on a solid empirical basis
What were the outcomes and expected benefits?	Information basis for the assessment of the market for energy services and therefore also a basis for the detection of challenges and a further development of the market for energy services
What were the key lessons learned?	

Is there anything you would do differently in future?	The monitoring of the market is a fundamental task for the Federal Office of Economics and Export Control (BAFA) and not just an exercise for the NEEAP. Therefore this study is a first step. The results are very helpful for our work, but naturally there are still questions unanswered or several energy services not covered. Further efforts will focus on closing these information gaps
What makes this a good practice example?	At least for Germany, it's a study which covers important parts of the market for energy services on a solid empirical basis. Such a comprehensive study was not done so far.
